

HAAD Version 0.4 Public Release

Release, reading order, and licensing

Version 0.4 · Public-review and structured-testing draft

Author: Kevin V. Watson

DOI: 10.5281/zenodo.21683276

Release date: July 29, 2026

Copyright: Copyright © 2026 Kevin V. Watson. File-specific Creative Commons licences apply.

Notice. The sealed reference model is intentionally excluded from the public release. Publication before practitioner and independent-review analyses are complete would compromise the testing design.

Reading order

Zenodo displays files alphabetically. Numeric prefixes enforce this reading order:

1. 00_HAAD_Methodology_v0.4 - canonical methodology and controlling specification.
2. 01_HAAD_Executive_Overview_v0.4 - concise orientation.
3. 02_HAAD_Practitioner_Workpapers_v0.4 - operational forms.
4. 03_HAAD_Pilot_Evidence_Packs_v0.4 - practitioner-facing synthetic scenarios.
5. 04_README_FIRST_HAAD_v0.4 - release and licensing information.
6. 05_HAAD_RELEASE_MANIFEST_v0.4 - file inventory and SHA-256 hashes.

Markdown, editable Word, and archival PDF versions are supplied. Files with the same numeric prefix contain the same substantive document in different formats.

Controlled material excluded

The sealed *HAAD Structured-Scenario Pilot Reference Model and Agreement Instrument* is intentionally excluded from this public release. Public disclosure before practitioner and independent-review analyses are complete would compromise the testing design.

Copyright and licensing

Copyright © 2026 Kevin V. Watson.

- The canonical methodology and executive overview are licensed under the [Creative Commons Attribution 4.0 International Licence](#).
- The practitioner workpapers and pilot evidence packs are licensed under the [Creative Commons Attribution-NonCommercial 4.0 International Licence](#).
- Adaptations must identify their changes and must not be represented as official HAAD materials or as endorsed by the author.

The licences govern the protected expression in these documents. They do not convert HAAD into a validated standard or authorize claims of certification, endorsement, or official status.
